

MegaPhase®

We Armor Our Low-Loss EMC Test Cables As You Armor Your Military.

Wrapping our MegaPhase® EMC Test Cable in protective armor is just one example of what we do to provide precision. We design these rugged cables to be ultra low loss and ultra dependable. They're made of materials that meet electromagnetic compatibility standards. The cable assemblies offer excellent shielding. And if your tests have specific EMI/RFI requirements, you'll find we have exactly the features you need. Call or visit our website for more information about the EMC Test Cable that's made with an understanding of how important EMC tests really are.

**With the right connections,
anything is possible.**
